Corporation Secretary One-Pager

LOSVINCA — DIGITAL BOARD GOVERNANCE PLATFORM

Document Status: READY TO USE unless marked otherwise **Prepared by:** Losvinca **Target Audience:** Corporation Secretaries, Board Secretaries, Company Secretaries **Format:** Single-page sales sheet (A4 or Letter, one side)

ONE-PAGER COPY

E-Board for Corporation Secretaries

Stop Chasing Papers. Start Governing.

You coordinate every board meeting, compile every board pack, track every resolution, and maintain every record — yet your tools are email threads, Word documents, shared drives, and paper files. E-Board replaces this fragmented process with a single, structured platform built for exactly the work you do.

The Problem You Know Too Well

- Weeks spent compiling, formatting, and distributing board packs manually
- Chasing directors and officers for board paper submissions and reviews
- No reliable way to verify that 10-day notice requirements have been met
- Conflict of interest declarations managed on paper with no centralized register
- Meeting minutes drafted in isolation with no direct link to resolutions or action items
- Board member records scattered across HR files, emails, and filing cabinets
- No auditable trail proving when documents were shared, reviewed, or approved
- Annual meeting calendars planned informally with limited CEO coordination

---

How E-Board Solves It

1. End-to-End Meeting Workflow CURRENT PRODUCT CAPABILITY

A structured 10-stage process manages the entire meeting lifecycle: initiation, internal notice creation, CEO notice approval, officer assignments, board paper preparation with annexures, director review, CEO review with sticky notes, agenda building, live meeting management, and minutes capture with Word document export.

2. Automated Board Notices with Compliance Tracking CURRENT PRODUCT CAPABILITY

Generate formal board notices, route them for CEO approval, and distribute via email — with built-in 10-day advance notice tracking to ensure compliance with Kenyan governance requirements.

3. Multi-Stage Board Paper Review CURRENT PRODUCT CAPABILITY

Officers prepare papers, directors review, and the CEO conducts final review with sticky note annotations. Every version is tracked. Papers can include annexures and can be recalled if needed. Status notifications keep everyone informed.

4. Board Resolution Tracking CURRENT PRODUCT CAPABILITY

Create resolutions linked to specific meetings, assign them to responsible officers with due dates, and track status through pending, in progress, completed, and overdue stages. No resolution falls through the cracks.

5. Conflict of Interest Register CURRENT PRODUCT CAPABILITY

Board members declare conflicts with OTP verification and digital signature authentication. Export the complete register as PDF or CSV for regulatory reporting and institutional records.

6. Comprehensive Board Member Profiles CURRENT PRODUCT CAPABILITY

Maintain complete member records: qualifications, documents, photos, CVs, gazette notices, signature images. Profile completeness scoring highlights gaps. User accounts are created automatically upon registration.

7. Almanac Management CURRENT PRODUCT CAPABILITY

Plan the full annual meeting calendar, submit for CEO approval, generate PDF versions, manage revisions, and upload signed copies — all within a single, versioned workflow.

8. Document Repository with Access Control CURRENT PRODUCT CAPABILITY

Store board documents in categorized folders with three visibility levels: all members, committee-only, or specific named individuals. Track who has downloaded what.

9. Attendance Management CURRENT PRODUCT CAPABILITY

Digital attendance register with OTP verification and digital signatures. Export attendance records as PDF or CSV for institutional record-keeping.

10. Complete Audit Trail CURRENT PRODUCT CAPABILITY

Every action is logged automatically — who did what, when, from where, with before-and-after values. Filter by date, user, or action type. Export as PDF for governance reporting or regulatory review.

What Changes for You

Before E-Board	With E-Board
Weeks preparing board packs manually	Structured digital workflow with status tracking
Chasing paper submissions via email	Automated notifications at every stage
Paper-based conflict declarations	OTP-verified digital declarations with exportable register
Minutes drafted with no resolution linkage	Minutes captured with direct resolution creation
Board member records in scattered files	Centralized profiles with completeness scoring
No proof of notice compliance	Timestamped notice generation with CEO approval record
Manual attendance sheets	Digital attendance with OTP and signature verification
No audit trail for document access	Full audit log with IP, timestamp, and user tracking

Implementation

E-Board deploys on your institution's server infrastructure or in the cloud. A guided 6-step setup wizard configures your institution's identity, branding, workflows, role labels, email system, and administrator accounts. Your institution's branding — logos, colours, letterhead, CEO signature — is applied throughout the platform.

[REQUIRES LOSVINCA INPUT: Typical onboarding timeline for Corporation Secretary users, training format, and support contact details]

Pricing

[REQUIRES LOSVINCA INPUT: Pricing model — per-institution, per-user, or tiered. Include any government/public sector pricing if applicable.]
