Document Status: READY TO USE unless marked otherwise **Prepared by:** Losvinca **Target Audience:** Chief Executive Officers, Managing Directors, Accounting Officers **Format:** Single-page sales sheet (A4 or Letter, one side)

ONE-PAGER COPY

E-Board for CEOs

Full Visibility. Clear Accountability. Governance You Can Trust.

As CEO, every board decision passes through your office — notice approvals, board paper reviews, almanac sign-offs, resolution follow-up. Yet without a structured system, you rely on verbal updates, email chains, and manual tracking to know where things stand. E-Board gives you a single, secure platform where every governance action is visible, traceable, and under your direct oversight.

What E-Board Delivers for You

Executive Oversight at a Glance

Your dashboard surfaces what needs your attention right now: board papers awaiting your review, notices pending your approval, almanac submissions, and upcoming meetings. No more chasing updates from the Corporation Secretary or officers. CURRENT PRODUCT CAPABILITY

Structured Approval Workflows

Board notices require your formal approval before distribution. Board papers pass through officer preparation and director review before reaching you for final review — with sticky note annotations so you can provide specific, documented feedback. Almanac schedules are submitted for your approval with full version history. Every approval you grant is digitally recorded with timestamp and audit trail. CURRENT PRODUCT CAPABILITY

Resolution Follow-Through

Board resolutions are captured, assigned to responsible officers with due dates, and tracked through clear status stages: pending, in progress, completed, overdue. You see at a glance which decisions have been acted upon and which have stalled — without relying on manual progress reports. CURRENT PRODUCT CAPABILITY

Institutional Accountability

Every action in E-Board is logged: who created, edited, reviewed, or approved each document; when they did it; what changed. This comprehensive audit trail is your institution's evidence of due diligence — available for export as PDF at any time for oversight bodies, regulators, or internal review. CURRENT PRODUCT CAPABILITY

Secure Information Governance

Sensitive board papers and governance documents are no longer circulated via unsecured email or printed copies left in offices. E-Board controls exactly who sees what — with role-based access, three levels of document visibility, and download tracking. Board members access materials through a secure, iPad-optimized portal. CURRENT PRODUCT CAPABILITY

Conflict of Interest Transparency

Board members declare conflicts of interest through an OTP-verified, digitally signed process — not paper forms that can be lost or disputed. The complete register is exportable for regulatory compliance and institutional records. CURRENT PRODUCT CAPABILITY

Strategic Benefits

Governance Compliance Meet the requirements of the Mwongozo Code of Governance, Companies Act, and State Corporations Act with structured, documented processes — including 10-day board notice requirements and formal conflict of interest management.

Risk Reduction Eliminate the risks of lost documents, untracked resolutions, unsigned declarations, and undocumented approvals. Every governance action carries a digital record.

Institutional Continuity When leadership transitions occur, the institution's complete governance record — every meeting, every paper, every resolution, every approval — remains intact and accessible. No institutional memory is lost.

Operational Efficiency Replace weeks of manual board pack preparation with a structured digital workflow. Automated notifications eliminate the need for follow-up calls and reminder emails. Officers, directors, and the Corporation Secretary work within a single coordinated system.

Your Institution's Identity E-Board carries your institution's brand throughout — your logo, colours, letterhead, favicon, and CEO signature. It presents as your institution's own governance platform, not a third-party tool.

What This Means in Practice

Governance Area	Without E-Board	With E-Board
Board paper status	Ask the Corporation Secretary	View on your dashboard
Notice compliance	Trust that it was done	Timestamped record with your approval
Resolution follow-up	Wait for progress reports	Real-time status tracking

Governance Area	Without E-Board	With E-Board
Audit readiness	Compile records from multiple sources	Export comprehensive audit log as PDF
Board member declarations	Paper forms in a file	OTP-verified digital register
Document security	Email attachments, printed copies	Role-based access with download tracking

Implementation

E-Board is deployed on your institution's own server infrastructure or in the cloud — your data stays under your institution's control. A guided setup wizard configures the platform to your institution's identity, branding, and governance workflow in a matter of days, not months.

[REQUIRES LOSVINCA INPUT: Executive-level implementation summary — timeline, dedicated support contact, reference institutions if available]

See It in Action
