PART 9 — E-BOARD GOVERNMENT & INSTITUTIONAL SALES KIT

ICT Director One-Pager

LOSVINCA — DIGITAL BOARD GOVERNANCE PLATFORM

Document Status: READY TO USE unless marked otherwise **Prepared by:** Losvinca **Target Audience:** ICT Directors, ICT Managers, Chief Information Officers, Systems Administrators **Format:** Single-page sales sheet (A4 or Letter, one side)

ONE-PAGER COPY

E-Board — Technical Overview for ICT

A Governance Platform Your Infrastructure Team Can Deploy, Secure, and Support

E-Board is a self-hosted, Laravel-based board governance application built on a standard LAMP/LEMP stack. It gives your ICT department full control over deployment, data, security, and maintenance — no vendor-hosted black box, no external API dependencies for core functionality, no proprietary infrastructure requirements.

Architecture & Technology Stack

Component	Technology	Notes
Backend Framework	Laravel 9/10	PHP 8+ required
Database	MySQL	Standard relational database; compatible with existing MySQL infrastructure
Frontend	Bootstrap 5, Alpine.js, Tailwind CSS	Server-rendered views; no heavy SPA framework dependency
Authentication	Session-based with OTP 2FA	6-digit email OTP, 5-minute expiry, rate-throttled
Authorization	Spatie Laravel Permission	Industry-standard RBAC package for Laravel
Hosting	Self-hosted (LAMP/LEMP) or cloud	Your infrastructure, your control

[CURRENT PRODUCT CAPABILITY — all components listed above are in production use]

Security

Authentication & Access Control CURRENT PRODUCT CAPABILITY

- **OTP-Based Two-Factor Authentication** — 6-digit codes delivered via email with 5-minute expiry and request throttling
- **Account Lockout** — Automatic lockout after configurable failed login attempts
- **Forced Password Change** — Enforce password resets for new or compromised accounts
- **User Status Enforcement** — Active/inactive status controls with immediate effect on access
- **10 System Roles** — Superadmin, Admin, CEO, Corporation Secretary, Director, Division Head, DD Internal Audit, DD ICT, Board Member, Officer
- **Granular Permissions** — Spatie-based RBAC with grouped permission management; permissions configurable per role

Application Security CURRENT PRODUCT CAPABILITY

- **CSRF Protection** — Laravel's built-in CSRF token verification on all state-changing requests
- **Encryption** — Laravel's encryption facilities for sensitive data
- **Input Validation** — Server-side validation on all form submissions
- **File Upload Controls** — Configurable upload size limits (up to 20MB), format validation

Audit & Logging CURRENT PRODUCT CAPABILITY

- **Comprehensive Audit Trail** — Automatic logging of all INSERT, UPDATE, and DELETE operations with old and new values
- **Request Metadata** — IP address, user agent, and authenticated user captured with every log entry
- **Security Event Logging** — Failed logins, OTP requests, and security-relevant actions recorded
- **Filterable Audit Viewer** — Filter by date range, user, action type; view in application or export as PDF
- **Meeting-Scoped Audit (V2)** — Dedicated audit view scoped to individual meetings for focused governance review

Deployment & Configuration

Infrastructure Requirements CURRENT PRODUCT CAPABILITY

- **Web Server:** Apache or Nginx
- **PHP:** Version 8.0 or higher with standard extensions (OpenSSL, PDO, Mbstring, Tokenizer, XML, Ctype, JSON, BCMath, Fileinfo, GD)
- **Database:** MySQL 5.7+ or MySQL 8.0
- **Email:** SMTP server access (configurable through the application)
- **Storage:** Local filesystem for document storage; standard Laravel storage configuration
- **SSL:** TLS certificate (recommended; standard for any production web application)

[REQUIRES LOSVINCA INPUT: Minimum server specifications — RAM, CPU, disk space recommendations for various institution sizes]

Initial Setup CURRENT PRODUCT CAPABILITY

- **6-Step Setup Wizard** — Guided configuration covering: (1) Institution identity, (2) Branding and visual identity, (3) Workflow configuration, (4) Role label customization, (5) Email/SMTP configuration with test email, (6) Administrator account creation
- **White-Label Branding** — Configurable logos (header, footer, login), institutional colours, favicon, CEO signature image, letterhead background, and login page background
- **47 Kenyan Counties Pre-Loaded** — County reference data available out of the box
- **Financial Year Configuration** — Kenyan fiscal year (July-June) built in

Email Configuration CURRENT PRODUCT CAPABILITY

- **SMTP Integration** — Standard SMTP configuration (host, port, encryption, credentials)
- **Test Email Function** — Verify email delivery before going live
- **33+ Email Templates** — Pre-built templates covering the full governance workflow (notices, paper assignments, review notifications, meeting invitations, resolution assignments)
- **7 Mailable Classes** — Structured Laravel mailables for reliable, maintainable email delivery

---

Role-Based Access Control Detail

E-Board implements Spatie Laravel Permission with 10 predefined roles. Permissions are organized into logical groups and can be assigned or modified per role through the administrative interface. CURRENT PRODUCT CAPABILITY

Role	Typical Access Scope
Superadmin	Full system access, all configuration
Admin	Institution administration, user management
CEO	Approval workflows, executive dashboard, paper review
Corporation Secretary	Meeting management, board member management, full meeting workflow
Director	Paper review, meeting participation, committee membership
Division Head	Divisional oversight, paper preparation coordination
DD Internal Audit	Audit trail access, compliance review
DD ICT	System configuration, technical administration
Board Member	Board portal access, papers, notices, declarations, meetings
Officer	Paper preparation, assigned tasks, meeting support

Data Management

- **Database:** All data stored in MySQL with standard relational schema; compatible with your existing backup and replication procedures
- **Document Storage:** Files stored on the local filesystem via Laravel's storage abstraction; standard filesystem backup applies
- **PDF Generation:** Server-side PDF generation for almanacs, notices, attendance registers, conflict registers, board papers, and audit logs
- **CSV Export:** Attendance and conflict of interest data exportable as CSV
- **Word Export:** Meeting minutes exportable as Word documents

CURRENT PRODUCT CAPABILITY

What Is Not Currently Available

The following capabilities are not part of the current release. They are documented here for transparency so your ICT team can plan accordingly:

[FUTURE ENHANCEMENT — NOT CURRENTLY AVAILABLE]

- SMS notifications (current notification is email and in-app only)
- Video conferencing integration
- Native mobile application (iOS/Android) — current mobile access is via iPad-optimized web portal
- REST API for external system integration
- External calendar synchronization (Google Calendar, Outlook)
- Advanced analytics or business intelligence dashboards
- User-manageable document templates

Support & Maintenance

[REQUIRES LOSVINCA INPUT: Support model details — SLA tiers, response times, update/patch delivery mechanism, escalation contacts, documentation access, training for ICT staff]

Next Steps

Request a technical demonstration and architecture review with your ICT team. We will walk through the deployment process, security configuration, and integration considerations specific to your infrastructure environment.
