PART 20 — E-BOARD GOVERNMENT & INSTITUTIONAL SALES KIT

Case Study Template

LOSVINCA — DIGITAL BOARD GOVERNANCE PLATFORM

Reusable Case Study Structure for E-Board Implementations

TEMPLATE: CASE STUDY DOCUMENT

[ORGANISATION NAME]

Digitizing Board Governance with E-Board

A Losvinca Implementation Case Study

ORGANISATION PROFILE

Detail	Information
Organisation Name	[Full legal name]
Type	[State Corporation / Government Ministry / County Government / Regulatory Body / Public University / NGO / Other]
Sector	[Health / Education / Finance / Agriculture / Energy / Transport / ICT / Environment / Other]
Established	[Year]
Mandate	[1-2 sentence description of the organisation's mandate]
Board Composition	[Number of board members, e.g., "9 members including the Chairperson"]
Board Committees	[Number and names, e.g., "4 committees: Finance, Audit, HR, Technical"]
Board Meetings per Year	[e.g., "4 full board meetings + 12 committee meetings"]
Staff Involved in Board Operations	[e.g., "Corporation Secretary, 2 administrative officers, CEO's office"]
Location	[City, County]
Implementation Date	[Month, Year]

THE CHALLENGE

Governance Environment

[1-2 paragraphs describing the governance context — regulatory requirements, oversight expectations, the volume and complexity of board operations at this institution.]

Example framework:

[Organisation Name] operates under the oversight of [parent ministry/regulator] and is required to maintain rigorous governance standards in line with [relevant legislation, e.g., the State Corporations Act, the Mwongozo Code of Governance for State Corporations]. The board meets [frequency] and oversees [scope of operations]. With [number] board members serving on [number] committees, the volume of governance documentation — board papers, notices, minutes, and resolutions — is substantial.

Specific Pain Points

[Use bullet points to list the specific challenges the organisation faced before E-Board. Select from the following and customise:]

- **Board paper preparation and distribution:** [Describe the manual process — printing, binding, physical delivery, costs, time required]
- **Version control:** [Papers circulated via email with multiple versions creating confusion]
- **Meeting notice compliance:** [Difficulty ensuring 10-day advance notice was consistently met]
- **Conflict of interest management:** [Paper-based or absent; no verification mechanism]
- **Resolution tracking:** [Resolutions captured in minutes but not systematically tracked; no accountability mechanism]
- **Audit trail:** [No centralised record of governance actions; difficult to respond to audit queries]
- **Document management:** [Governance documents scattered across email accounts, shared drives, and physical files]
- **Accessibility:** [Board members unable to access papers remotely or on mobile devices]
- **Administrative burden:** [Significant staff time spent on printing, distribution, and follow-up]
- **Cost:** [Paper, printing, binding, courier, and storage costs]

The Trigger

[What prompted the organisation to seek a digital solution? Examples:]

- An audit finding related to governance documentation
- A directive from the parent ministry to digitize operations
- A new Corporation Secretary or CEO committed to modernisation
- Increasing board size or meeting frequency making manual processes unsustainable
- A specific governance failure that exposed the limitations of manual processes
- Government-wide digital transformation initiatives

THE EXISTING PROCESS

[Describe the board governance process before E-Board implementation. Be specific about workflows, tools used, and pain points at each stage.]

Before E-Board: How Board Meetings Were Managed

Stage	Process	Issues
Meeting Planning	[e.g., "Dates set informally via email and phone calls"]	[e.g., "No central calendar; scheduling conflicts common"]
Paper Preparation	[e.g., "Papers drafted in Word, emailed to reviewers"]	[e.g., "Multiple versions in circulation; no audit trail of changes"]
Paper Review	[e.g., "Emailed to CEO for review; feedback given verbally or via email"]	[e.g., "No structured review process; papers sometimes submitted without proper review"]
Notice Distribution	[e.g., "Notices emailed to board members individually"]	[e.g., "No confirmation of receipt; 10-day notice sometimes missed"]
Paper Distribution	[e.g., "Printed in [number] copies, bound, and delivered by courier/driver"]	[e.g., "Cost of KES [amount] per meeting; late delivery to some members"]
Meeting Day	[e.g., "Attendance recorded on a sign-in sheet; conflict of interest on a paper form"]	[e.g., "Forms sometimes not completed; no verification of declarations"]
Minutes	[e.g., "Typed after the meeting from handwritten notes"]	[e.g., "Delay of [days/weeks]; accuracy concerns"]
Resolutions	[e.g., "Listed in the minutes; tracked in a spreadsheet by the Corporation Secretary"]	[e.g., "No automated follow-up; resolutions often not tracked to completion"]
Document Storage	[e.g., "Physical files in the Corporation Secretary's office; some on shared drives"]	[e.g., "Difficult to retrieve historical documents; risk of loss"]

THE SOLUTION: E-BOARD IMPLEMENTATION

Why E-Board Was Selected

[2-3 paragraphs explaining why the organisation chose E-Board over alternatives. Potential differentiators to highlight:]

- Purpose-built for institutional governance (not a generic collaboration tool)
- 10-stage meeting workflow matching their governance requirements
- Conflict of interest management with OTP verification
- Comprehensive audit trail meeting oversight requirements
- White-label branding allowing institutional identity
- Role-based access matching their organisational structure (10 defined roles)
- Kenyan financial year alignment (July–June)
- Rapid deployment capability (setup wizard)

- Cost-effectiveness compared to alternatives
- Local support and understanding of Kenyan governance requirements

Platform Configuration

[Describe how E-Board was configured for the organisation:]

- **Branding:** [Logo, institutional colours, letterhead, login background]
- **Organisational Structure:** [Number of directorates and divisions configured]
- **Board Committees:** [Committees set up, including audit committee designation]
- **User Roles:** [Which of the 10 system roles were assigned and to whom]
- **Financial Year:** [July–June configuration]
- **Board Members:** [Number of members onboarded; profile completeness achieved]
- **Email Configuration:** [SMTP setup for automated notifications]

IMPLEMENTATION DETAILS

Phase	Activities	Duration
Phase 1: Configuration	Platform setup using 6-step wizard; branding, structure, financial year, committees, roles	[e.g., "2 days"]
Phase 2: Data Migration	Board member profiles, historical documents uploaded to repository	[e.g., "3 days"]
Phase 3: Training	Role-specific training — Superadmin/Admin, Corporation Secretary, CEO, Board Members	[e.g., "3 sessions over 1 week"]
Phase 4: Pilot	First board meeting conducted on the platform with support	[e.g., "1 meeting"]
Phase 5: Go-Live	Full adoption for all board and committee meetings	[e.g., "From [date]"]
Total Duration	Configuration to go-live	[e.g., "3 weeks"]

Training Approach

User Group	Training Focus	Format	Duration
Superadmin/Admin	System configuration, user management, troubleshooting	[e.g., "In-person workshop"]	[e.g., "Half day"]
Corporation Secretary	Full meeting workflow, paper management, almanac, notices, minutes, resolutions	[e.g., "In-person workshop"]	[e.g., "Full day"]
CEO	Approval workflows, dashboard, resolution oversight	[e.g., "One-on-one session"]	[e.g., "1 hour"]
Board Members	Accessing papers, conflict of interest process, digital signatures	[e.g., "Group session or individual onboarding"]	[e.g., "1 hour"]

User Group	Training Focus	Format	Duration
Officers	Paper preparation, annexure management, assignment completion	[e.g., "Group workshop"]	[e.g., "Half day"]

RESULTS

Quantitative Results

[Present measurable outcomes. Use the metrics framework below to collect data:]

Metric	Before E-Board	After E-Board	Improvement
Paper preparation and distribution time	[e.g., "5 days"]	[e.g., "Same day"]	[e.g., "80% reduction"]
Printing and binding cost per meeting	[e.g., "KES 45,000"]	[e.g., "KES 0"]	[e.g., "100% elimination"]
Notice compliance (10-day advance)	[e.g., "70% of meetings"]	[e.g., "100% of meetings"]	[e.g., "Full compliance achieved"]
Resolution tracking completion rate	[e.g., "40% tracked to closure"]	[e.g., "95% tracked to closure"]	[e.g., "55 percentage point improvement"]
Conflict of interest declaration rate	[e.g., "Inconsistent"]	[e.g., "100% with OTP verification"]	[e.g., "Full compliance with verification"]
Time to respond to audit queries (governance)	[e.g., "3-5 days to compile documents"]	[e.g., "Immediate — PDF export"]	[e.g., "From days to minutes"]
Board paper versions in circulation	[e.g., "Multiple uncontrolled versions"]	[e.g., "Single controlled version"]	[e.g., "Version confusion eliminated"]
Administrative staff time on board operations	[e.g., "15 person-days per meeting cycle"]	[e.g., "5 person-days per meeting cycle"]	[e.g., "67% reduction"]

Qualitative Results

[Select and customise from the following:]

- **Governance compliance:** [e.g., "The organisation now maintains a complete, auditable governance trail. Every action — from paper submission to CEO approval to board member attendance — is logged with timestamps, user identity, and IP address."]
- **Accountability:** [e.g., "Board resolutions are no longer lost in minutes. Each resolution is assigned, tracked, and visible on the CEO's dashboard. Overdue items are flagged automatically."]
- **Accessibility:** [e.g., "Board members now access their papers through an iPad-optimised portal, eliminating the need for printed packs and enabling preparation from any location."]
- **Efficiency:** [e.g., "The Corporation Secretary's office has been freed from the administrative burden of printing, binding, and distributing board papers, allowing focus on substantive governance work."]

- **Security:** [e.g., "Document access is controlled by role and visibility level, with every download tracked. Two-factor authentication protects system access."]
- **Professionalism:** [e.g., "Board notices, papers, and minutes now carry consistent institutional branding through the white-label configuration."]

BENEFITS SUMMARY

For the Board

- Access board papers digitally from any location via iPad-optimised portal
- Clear conflict of interest process with OTP verification and digital signature
- Visibility into resolution status and institutional follow-through
- Professional, branded governance documentation

For the Corporation Secretary

- Structured 10-stage workflow replacing ad hoc processes
- Automated notifications eliminating manual follow-up
- Board paper versioning with complete change history
- Almanac management with CEO approval and PDF generation
- Minutes captured in real time and exportable to Word
- Conflict of interest register maintained automatically

For the CEO

- Approval workflows for notices, almanac, and board papers directly in the platform
- Dashboard visibility into board operations and resolution status
- Confidence that governance processes are being followed consistently

For Internal Audit

- Comprehensive audit trail with before/after values for every action
- IP address tracking for all system access
- PDF export of the complete audit trail
- Conflict of interest register with verified declarations
- Download tracking for all documents in the repository

For the Institution

- Elimination of paper, printing, binding, and courier costs
- Reduced administrative burden on governance staff
- Compliance with governance standards and oversight requirements
- Institutional knowledge preserved in a secure, searchable digital repository
- Professional institutional image through consistent branding

---

TESTIMONIAL

> *"[INSERT QUOTE — 2-4 sentences from a senior stakeholder such as the Corporation Secretary, CEO, or Board Chairperson. The quote should speak to the specific impact on their role and the institution's governance.]"*
> *— **[Name]**, [Title], [Organisation Name]*

Guidance for collecting testimonials:

- Ask the Corporation Secretary about efficiency improvements in their daily work
- Ask the CEO about visibility into governance operations and resolution tracking
- Ask a Board Member about the experience of accessing papers digitally and the conflict of interest process
- Ask the Board Chairperson about the overall improvement in governance standards
- Keep quotes specific — avoid generic praise; focus on measurable or observable changes

---

ABOUT E-BOARD

E-Board by Losvinca is a digital board governance platform designed for government institutions, state corporations, and organisations with formal boards. The platform digitizes the complete board meeting lifecycle — from paper preparation through meeting management to resolution tracking — with comprehensive audit trails, conflict of interest management, and role-based security.

METRICS COLLECTION FRAMEWORK

Metrics to Collect from Customers for Stronger Case Studies

The following metrics should be collected at two points: (1) before E-Board implementation (baseline) and (2) after at least 3 board meeting cycles on the platform.

Category 1: Time Savings

Metric	How to Measure	Why It Matters
Board paper preparation time	Time from first draft to final approved version (days)	Demonstrates workflow efficiency
Board paper distribution time	Time from CEO approval to delivery to all board members (hours/days)	Shows elimination of physical distribution
Meeting notice preparation and distribution time	Time from notice creation to delivery to all members (hours)	Demonstrates automation value
Minutes preparation time	Time from meeting conclusion to draft minutes available (days)	Shows real-time capture benefit
Time to compile governance documents for audit	Time to assemble requested governance records (hours/days)	Demonstrates audit readiness
Administrative staff time per meeting cycle	Person-days spent on board operations per meeting cycle	Quantifies labour savings
Time for board members to access papers	Time from paper availability to board member access (hours/days)	Shows instant digital access benefit

Category 2: Cost Reduction

Metric	How to Measure	Why It Matters
Printing costs per meeting	Total printing and photocopying costs per board/committee meeting (KES)	Direct, tangible saving
Paper and binding materials per meeting	Cost of paper, binding covers, and supplies (KES)	Additional tangible saving
Courier/delivery costs per meeting	Cost of delivering board packs to members (KES)	Especially significant for members in different locations
Storage costs	Cost of physical storage for governance documents (KES per year)	Long-term saving
Annual total board operations cost	Sum of all board-related operational costs (KES)	Headline number for executive summary

Category 3: Compliance and Governance

Metric	How to Measure	Why It Matters
10-day notice compliance rate	Percentage of meetings where notice was sent at least 10 days in advance	Demonstrates regulatory compliance
Conflict of interest declaration rate	Percentage of board members completing declarations per meeting	Shows governance rigour
Conflict of interest verification rate	Percentage of declarations verified with OTP	Shows accountability enhancement

Metric	How to Measure	Why It Matters
Resolution tracking rate	Percentage of resolutions formally tracked after each meeting	Demonstrates follow-through
Resolution completion rate	Percentage of resolutions completed by due date	Shows institutional effectiveness
Overdue resolution rate	Percentage of resolutions past due date	Identifies accountability gaps (before vs. after)
Audit trail completeness	Whether every governance action is logged with user, timestamp, and details	Demonstrates audit readiness

Category 4: Adoption and Usage

Metric	How to Measure	Why It Matters
Board member adoption rate	Percentage of board members actively using the platform	Shows user acceptance
Paper access rate	Percentage of board members who access papers digitally before meetings	Demonstrates engagement
Average profile completeness	Average profile completeness score across board members	Shows data quality
Number of board meetings conducted on platform	Total meetings managed through E-Board since go-live	Shows sustained adoption
Number of board papers processed	Total papers created and reviewed through the platform	Shows workflow utilisation
Number of resolutions tracked	Total resolutions created and monitored	Shows resolution management adoption

Category 5: Qualitative Feedback

Question	Ask Whom	Why It Matters
"How has E-Board changed your daily governance workflow?"	Corporation Secretary	Personal efficiency story
"What is the most significant difference in how the board operates?"	CEO or Chairperson	Strategic governance improvement
"How do you find the experience of accessing board papers digitally?"	Board Members	User experience validation
"How has E-Board affected your ability to respond to audit queries?"	Internal Audit / Corporation Secretary	Compliance story
"What did you spend your time on before that you no longer need to?"	Administrative staff	Time reallocation story
"Would you recommend E-Board to a peer institution? Why?"	Any stakeholder	Referral potential and testimonial

Data Collection Approach

1. **Baseline survey:** Before implementation, ask the Corporation Secretary and administrative staff to document current metrics (time, cost, compliance rates)
2. **Post-implementation survey:** After 3 full meeting cycles on E-Board, collect the same metrics
3. **Qualitative interviews:** 15-20 minute conversations with 3-4 stakeholders (Corporation Secretary, CEO, one Board Member, Internal Audit)
4. **Platform data:** Extract usage statistics from E-Board (papers processed, meetings conducted, resolutions tracked, audit trail entries)
5. **Financial records:** Request printing, courier, and storage invoices for before/after comparison

Case Study Writing Guidelines

- **Use specific numbers wherever possible** — "reduced from 5 days to same-day" is stronger than "significantly reduced"
- **Let the customer's words tell the story** — direct quotes are more credible than your description
- **Focus on outcomes, not features** — "100% conflict of interest compliance with OTP verification" rather than "the platform has OTP"
- **Include the before picture** — readers need to understand the starting point to appreciate the improvement
- **Keep it to 2-3 pages** — decision-makers do not read long case studies
- **Use institutional language** — match the formality expected in government and institutional contexts
- **Get written approval** — always obtain written permission from the organisation before publishing
