RISK FACTORS AND MITIGATIONS

Risk	Likelihood	Mitigation
Longer-than-expected government procurement cycles	High	Start government prospects early. Pursue private institutions in parallel for faster wins.
Budget cycle misalignment (FY starts July)	Medium	For government: Time proposals to align with October-January budget preparation. Focus on organisations with existing ICT budgets.
Difficulty reaching decision-makers	High	Use multiple channels: LinkedIn, email, phone, events, referrals. Target Corporation Secretaries first (they own the board governance problem).
Prospects wanting features E-Board does not have (e.g., video conferencing, voting)	Medium	Position as complementary to existing tools (Zoom for video, E-Board for governance workflow). Document feature requests for product roadmap.
Technical concerns from ICT teams	Medium	Prepare thorough technical documentation. Offer self-hosted option for security-conscious organisations.
Cash flow pressure before first revenue	High	Minimise costs. Pursue quick-win private institutions while building government pipeline. Consider offering discounted first-year pricing for early adopters.
