PART 24 — E-BOARD GOVERNMENT & INSTITUTIONAL SALES KIT

Sales KPIs

LOSVINCA — DIGITAL BOARD GOVERNANCE PLATFORM

Losvinca Sales Kit | Key Performance Indicators for E-Board Sales

Document Classification: Internal Sales Operations **Applicability:** Kenya and African Institutional Markets **Status:** READY TO USE

KPI FRAMEWORK OVERVIEW

This document defines the key performance indicators Losvinca should track to measure, manage, and optimise E-Board sales performance. KPIs are organised into five categories:

1. **Pipeline Activity KPIs** — Measuring sales effort and outreach
2. **Conversion KPIs** — Measuring pipeline progression
3. **Revenue KPIs** — Measuring financial performance
4. **Efficiency KPIs** — Measuring cost and time effectiveness
5. **Retention KPIs** — Measuring customer health and growth

Each KPI includes: definition, calculation method, recommended initial target (Year 1 in the Kenyan market), measurement frequency, and the action to take when the KPI is off-track.

---

1. PIPELINE ACTIVITY KPIs

1.1 Total Leads Generated

Definition: The total number of new organisations identified and added to the prospect database, regardless of qualification status.

Calculation: Count of new organisation records added to CRM in the period.

Recommended Initial Target:

- Monthly: 20-30 new leads
- Quarterly: 60-80 new leads
- Year 1: 200-300 total leads

Measurement Frequency: Weekly

Source Breakdown to Track:

Lead Source	Target % of Total

Outbound prospecting (research, cold outreach)	40%
LinkedIn engagement	20%
Events and networking	15%
Referrals from existing contacts/customers	15%
Webinars and content marketing	10%

Off-Track Action: If below target, increase outbound prospecting activity. Review target organisation list for untapped segments. Increase LinkedIn posting frequency. Attend more events.

1.2 Qualified Prospects

Definition: Organisations that have been confirmed to have a formal board, an identified decision-maker, and an expressed or implied need for board governance digitisation.

Calculation: Count of prospects that pass from "Prospect" to "Discovery" stage in CRM.

Recommended Initial Target:

- Monthly: 8-12 qualified prospects
- Quarterly: 25-35 qualified prospects
- Year 1: 80-120 qualified prospects

Lead-to-Qualified Conversion Rate Target: 35-45%

Measurement Frequency: Weekly

Qualification Criteria (all must be met):

- Organisation has a formal board or governance committee
- At least one decision-maker or influencer identified by name
- Contact has been made and acknowledged (email response, call, meeting)
- No immediate disqualifying factor (e.g., already using competitor, no budget authority, organisation too small)

Off-Track Action: If qualification rate is low, review targeting criteria. Are you reaching the right organisations? If high lead volume but low qualification, tighten lead generation criteria rather than generating more unqualified leads.

1.3 Meetings Conducted

Definition: The number of discovery calls, demos, and follow-up meetings held with qualified prospects.

Calculation: Count of logged meetings in CRM.

Recommended Initial Target:

- Weekly: 3-5 meetings
- Monthly: 12-18 meetings
- Quarterly: 35-50 meetings

Breakdown:

Meeting Type	Monthly Target
Discovery meetings	5-8
Product demonstrations	3-5
Follow-up/proposal meetings	3-5
Technical/ICT assessment meetings	1-2

Measurement Frequency: Weekly

Off-Track Action: If below target, increase phone and email follow-up intensity. Offer more flexible meeting options (virtual vs. in-person). Ensure meeting requests are going to the right contacts (Corporation Secretaries and CEOs, not junior staff who cannot schedule).

1.4 Demos Delivered

Definition: The number of formal E-Board product demonstrations delivered to qualified prospects.

Calculation: Count of completed demo sessions.

Recommended Initial Target:

- Monthly: 3-5 demos
- Quarterly: 10-15 demos
- Year 1: 40-50 demos

Measurement Frequency: Weekly

Off-Track Action: If below target, review Discovery-to-Demo conversion. Are discovery meetings ending with clear next steps? Is demo scheduling being delayed? Consider offering group demos or webinar-style demos to increase throughput.

1.5 LinkedIn Activity Metrics

Definition: Engagement metrics from LinkedIn content and outreach.

Metrics to Track:

Metric	Monthly Target
Posts published	4-8
Articles published	1-2
Connection requests sent	40-60
Connection requests accepted	20-30

Metric	Monthly Target
Post impressions	2,000-5,000
Profile views	100-200
Direct messages sent (outreach)	20-30

Measurement Frequency: Monthly

Off-Track Action: Improve content quality and relevance. Post about governance challenges, Mwongozo compliance, and board best practices rather than product features. Engage with other people's content (comments, shares) to increase visibility.

---

2. CONVERSION KPIs

2.1 Stage Conversion Rates

Definition: The percentage of prospects that advance from one funnel stage to the next.

Calculation: (Number of prospects advancing to next stage / Number of prospects in current stage) x 100

Recommended Initial Targets:

Stage Transition	Year 1 Target	Minimum Acceptable
Prospect to Discovery	35-45%	25%
Discovery to Demo	50-60%	40%
Demo to Pilot	40-50%	30%
Pilot to Proposal	70-80%	60%
Proposal to Signed Contract	40-50%	30%
Overall: Lead to Customer	**3-5%**	**2%**

Measurement Frequency: Monthly (review), Quarterly (trend analysis)

Off-Track Action by Stage:

- **Low Prospect-to-Discovery:** Improve initial outreach messaging. Target more relevant organisations.
- **Low Discovery-to-Demo:** Strengthen discovery process. Ensure pain points are clearly identified and E-Board's relevance is established before proposing a demo.
- **Low Demo-to-Pilot:** Improve demo quality and customisation. Ensure demos address specific prospect pain points. Review objection handling.
- **Low Pilot-to-Proposal:** Increase pilot support. Ensure prospects complete a full meeting cycle during pilot. Address issues proactively.
- **Low Proposal-to-Contract:** Review pricing competitiveness. Strengthen ROI arguments. Improve proposal quality. Build stronger relationships with decision-makers.

2.2 Pilot Conversion Rate

Definition: The percentage of pilot engagements that convert to paying subscriptions.

Calculation: (Number of pilots converted to paid / Total pilots completed) x 100

Recommended Initial Target: 60-70%

Minimum Acceptable: 50%

Measurement Frequency: Per pilot completion, aggregated quarterly

Off-Track Action: If below target, review pilot scope and support. Are pilots too short? Too unsupported? Is the organisation completing a full meeting cycle? Are the right stakeholders involved? Consider extending pilot duration or increasing support intensity rather than starting more pilots.

2.3 Win Rate

Definition: The percentage of all formal proposals that result in signed contracts.

Calculation: (Number of signed contracts / Number of formal proposals submitted) x 100

Recommended Initial Target: 40-50%

Minimum Acceptable: 30%

Measurement Frequency: Quarterly

Off-Track Action: Analyse lost deals. Common reasons: pricing, feature gaps, procurement delays, competitor selection, budget reallocation, change in management. Address the most common loss reason first.

2.4 Pipeline Velocity

Definition: The speed at which opportunities move through the sales funnel.

Calculation: (Number of opportunities x Average deal value x Win rate) / Average sales cycle length (days)

Recommended Initial Target: Establish baseline in Q1, improve by 10-15% per quarter.

Measurement Frequency: Monthly

Off-Track Action: Identify and unblock stalled opportunities. Remove dead deals from active pipeline. Focus on deals with highest probability and shortest time-to-close.

---

3. REVENUE KPIs

3.1 Monthly Recurring Revenue (MRR)

Definition: The total predictable monthly revenue from all active subscriptions.

Calculation: Sum of all active monthly subscription values. For annual subscriptions, divide annual value by 12.

Recommended Initial Targets:

Timeline	MRR Target (KES)
End of Month 3	50,000 - 100,000
End of Month 6	150,000 - 300,000
End of Month 9	300,000 - 500,000
End of Year 1	500,000 - 800,000

Measurement Frequency: Monthly

Off-Track Action: Accelerate conversion of prospects in late-stage pipeline. Review pricing — are deals being discounted too heavily? Pursue higher-value (larger board/more users) organisations.

3.2 Annual Recurring Revenue (ARR)

Definition: The annualised value of all active subscriptions.

Calculation: MRR x 12

Recommended Initial Target:

- End of Year 1: KES 6,000,000 - 10,000,000

Measurement Frequency: Monthly (tracked), Quarterly (reported)

3.3 Average Revenue Per Customer (ARPC)

Definition: The average annual subscription value per paying customer.

Calculation: Total ARR / Number of active paying customers

Recommended Initial Target: KES 600,000 - 1,200,000 per year per customer (varies significantly by organisation size — state corporations on the higher end, smaller NGOs on the lower end)

Measurement Frequency: Quarterly

Off-Track Action: If ARPC is too low, focus prospecting on larger organisations. If too high, ensure pricing is not a barrier to smaller organisations. Consider tiered pricing.

3.4 Total Contract Value (TCV)

Definition: The total value of all signed contracts including multi-year commitments.

Calculation: Sum of all signed contract values (including multi-year terms at full value).

Recommended Initial Target:

- End of Year 1: KES 8,000,000 - 15,000,000

Measurement Frequency: Quarterly

3.5 New Business Revenue

Definition: Revenue from newly acquired customers (first-time subscriptions).

Calculation: Sum of first-year subscription values from customers acquired in the period.

Recommended Initial Target:

- Quarterly: KES 1,500,000 - 3,000,000
- Year 1: KES 6,000,000 - 10,000,000

Measurement Frequency: Monthly

3.6 Expansion Revenue

Definition: Additional revenue from existing customers through upsells, additional users, or additional services.

Calculation: Revenue from existing customers above their initial subscription value.

Recommended Initial Target:

- Year 1: 10-15% of total revenue (expansion will be minimal initially but should grow)

Measurement Frequency: Quarterly

---

4. EFFICIENCY KPIs

4.1 Customer Acquisition Cost (CAC)

Definition: The total cost of acquiring a new paying customer.

Calculation: Total sales and marketing costs in period / Number of new customers acquired in period

Include in costs: Salaries (sales team portion), travel, events, marketing materials, tools (CRM, email, LinkedIn), demo environment hosting, pilot costs.

Recommended Initial Target:

- Year 1: KES 100,000 - 250,000 per customer (higher in early stages, declining as processes mature)

- Year 2 target: KES 60,000 - 150,000 per customer

Measurement Frequency: Quarterly

Off-Track Action: If CAC is too high, focus on higher-converting lead sources. Increase referral-based acquisition (lowest CAC). Improve conversion rates at each stage. Reduce time spent on unqualified prospects.

4.2 CAC Payback Period

Definition: The number of months required to recover the cost of acquiring a customer through their subscription revenue.

Calculation: CAC / Monthly subscription revenue per customer

Recommended Initial Target: 6-12 months

Maximum Acceptable: 18 months

Measurement Frequency: Quarterly

Off-Track Action: If payback period exceeds 12 months, review either CAC (reduce acquisition costs) or ARPC (increase pricing or upsell).

4.3 Sales Cycle Length

Definition: The average number of days from first contact to signed contract.

Calculation: Average of (Contract signed date - First contact date) for all deals closed in period.

Recommended Initial Targets:

Customer Type	Target Sales Cycle
Private institution (NGO, private company)	45-90 days
Parastatal / State corporation	90-180 days
Government ministry/department	120-240 days
County government entity	90-180 days
Blended average	**90-120 days**

Measurement Frequency: Per deal closed, aggregated quarterly

Off-Track Action: If sales cycle is too long, identify where deals stall. Common bottlenecks: waiting for demo scheduling (push harder for dates), ICT assessment delays (provide documentation proactively), procurement process (cannot be shortened, but can be anticipated). Pre-qualify budget availability early.

4.4 Cost Per Lead (CPL)

Definition: The average cost to generate one qualified lead.

Calculation: Total lead generation costs / Number of qualified leads generated

Recommended Initial Target: KES 2,000 - 5,000 per qualified lead

Measurement Frequency: Monthly

Off-Track Action: Shift spend to lower-cost lead sources. LinkedIn organic content and referrals have the lowest CPL; events and paid advertising have the highest.

4.5 Activity Efficiency Ratios

Definition: Ratios measuring the productivity of sales activities.

Ratio	Definition	Target
Emails to Response	Outreach emails sent per response received	5:1 to 8:1
Calls to Meeting	Calls made per meeting scheduled	4:1 to 6:1
Meetings to Demo	Meetings conducted per demo delivered	2:1 to 3:1
Demos to Pilot	Demos delivered per pilot initiated	2:1 to 3:1
Pilots to Customer	Pilots completed per paying customer	1.5:1 to 2:1

Measurement Frequency: Monthly

---

5. RETENTION KPIs

5.1 Customer Churn Rate

Definition: The percentage of customers who cancel or do not renew their subscription in a given period.

Calculation: (Customers lost in period / Customers at start of period) x 100

Recommended Initial Target:

- Annual churn: Less than 15%
- Monthly churn: Less than 1.5%

Ideal Target (Year 2+):

- Annual churn: Less than 10%
- Monthly churn: Less than 1%

Measurement Frequency: Monthly (tracked), Quarterly (action reviewed)

Off-Track Action: If churn exceeds target, conduct exit interviews with churned customers. Common institutional churn reasons: change in management, budget cuts, underutilisation, technical issues. Address root causes: increase customer success touchpoints, improve training, ensure usage during board meetings.

5.2 Revenue Churn Rate

Definition: The percentage of recurring revenue lost due to cancellations and downgrades.

Calculation: (MRR lost from churned/downgraded customers in period / MRR at start of period) x 100

Recommended Initial Target:

- Monthly revenue churn: Less than 2%
- Annual revenue churn: Less than 15%

Measurement Frequency: Monthly

Off-Track Action: If a single large customer churns, it can spike this metric. Diversify customer base to avoid over-reliance on any single account. For large accounts, assign dedicated account management.

5.3 Net Revenue Retention (NRR)

Definition: The percentage of revenue retained from existing customers, including expansions, upsells, and churn.

Calculation: (MRR at start of period + Expansion MRR - Churned MRR) / MRR at start of period x 100

Recommended Initial Target:

- Year 1: 90-100% (acceptable given early-stage dynamics)
- Year 2+: 100-110% (target net positive — expansions should exceed churn)

Measurement Frequency: Quarterly

5.4 Renewal Rate

Definition: The percentage of customers who renew their subscription when it comes due.

Calculation: (Number of customers who renewed / Number of customers whose subscription was due for renewal) x 100

Recommended Initial Target: 80-85%

Year 2+ Target: 85-90%

Measurement Frequency: Per renewal event, aggregated quarterly

Off-Track Action: Begin renewal engagement 90 days before expiry. Conduct customer success reviews. Demonstrate value delivered (meetings conducted, documents managed, audit trail entries). Address any outstanding issues before renewal.

5.5 Customer Lifetime Value (CLV/LTV)

Definition: The predicted total revenue from a customer over the entire duration of their relationship with Losvinca.

Calculation: Average Revenue Per Customer Per Year x Average Customer Lifespan (years)

Alternative: ARPC / Annual Churn Rate

Recommended Initial Target: KES 2,000,000 - 5,000,000 (based on 3-5 year average lifespan)

Measurement Frequency: Annually (recalculated as data accumulates)

Key Ratio — LTV:CAC: Should be at least 3:1. If LTV is KES 3,000,000 and CAC is KES 200,000, the ratio is 15:1 (excellent). Below 3:1 indicates the business model needs adjustment.

5.6 Referral Rate

Definition: The percentage of new customers acquired through referrals from existing customers.

Calculation: (Number of new customers from referrals / Total new customers) x 100

Recommended Initial Target:

- Year 1: 10-15% of new customers from referrals
- Year 2+: 20-30% of new customers from referrals

Measurement Frequency: Quarterly

Off-Track Action: If referral rate is low, actively ask for referrals at post-implementation and renewal touchpoints. Create a structured referral programme. Corporation Secretaries and CEOs network extensively within their sectors — leverage this.

5.7 Net Promoter Score (NPS)

Definition: A measure of customer satisfaction and likelihood to recommend E-Board.

Calculation: Survey customers with the question: "On a scale of 0-10, how likely are you to recommend E-Board to a colleague?" NPS = % Promoters (9-10) - % Detractors (0-6)

Recommended Initial Target: NPS of 30-50 (good for B2B SaaS)

Year 2+ Target: NPS of 50+ (excellent)

Measurement Frequency: Semi-annually (survey all active customers)

Off-Track Action: Follow up with detractors individually. Address their concerns. Identify systemic issues affecting satisfaction.

KPI DASHBOARD SUMMARY

Primary KPIs (Track Weekly)

KPI	Target	Current	Status
New leads generated	5-8/week	REQUIRES LOSVINCA INPUT	
Meetings conducted	3-5/week		
Demos delivered	1-2/week		
Pipeline value (active)	Growing		

Secondary KPIs (Track Monthly)

KPI	Target	Current	Status
Qualified prospects	8-12/month	REQUIRES LOSVINCA INPUT	
Pilots initiated	1-2/month		
MRR	Per target schedule		
CAC	KES 100K-250K		
Sales cycle (avg days)	90-120 days		

Strategic KPIs (Track Quarterly)

KPI	Target	Current	Status
ARR	Per target schedule	REQUIRES LOSVINCA INPUT	
Win rate	40-50%		
Customer churn	Less than 15% annual		
Renewal rate	80-85%		
NRR	90-100%		
LTV:CAC ratio	Greater than 3:1		
Referral rate	10-15%		

REPORTING CADENCE

Report	Frequency	Content	Audience
Daily Activity Log	Daily	Calls, emails, meetings, CRM updates	Salesperson self-management

Report	Frequency	Content	Audience
Weekly Pipeline Review	Weekly	Stage movements, next actions, blockers	Sales team + founder
Monthly Sales Report	Monthly	All pipeline and revenue KPIs, trend analysis	Leadership team
Quarterly Business Review	Quarterly	Full KPI dashboard, conversion analysis, strategic adjustments	Leadership + investors/board
Annual Review	Annually	Year-in-review, all KPIs vs. targets, next-year targets	All stakeholders

YEAR 1 TARGET SUMMARY

Metric	Q1 Target	Q2 Target	Q3 Target	Q4 Target	Year 1 Total
New leads	60-80	60-80	50-70	50-70	220-300
Qualified prospects	25-35	25-35	20-30	20-30	90-130
Demos delivered	10-15	12-18	10-15	10-15	42-63
Pilots initiated	5-7	5-8	4-6	4-6	18-27
New customers	3-4	4-5	3-5	3-5	13-19
MRR (end of quarter)	100K	300K	500K	800K	800K
ARR (end of quarter)	1.2M	3.6M	6.0M	9.6M	9.6M

All KES values in thousands

Document Status: READY TO USE **Note:** REQUIRES LOSVINCA INPUT — Actual current values to be filled in once tracking begins. Targets should be reviewed and adjusted after the first 90 days based on market reality. **Cross-references:** Parts 13 (Pricing), 22 (Sales Funnel), 23 (90-Day Plan) of the Sales Kit
